Doctoral Clinical Psychology Internship

Our one-year, fully accredited internship program embraces a scientist-practitioner model. We prepare a skilled healthcare workforce that is trained in and employs evidence-based techniques to deliver superior patient care.

Our didactic and experiential training activities assure trainee competencies in behavioral health, and its integration into primary care. Our program prepares interns guided by a model of collaborative, team-based care and we work in conjunction with the UAriZona College of Nursing’s faculty and its psychiatric nurse practitioner doctoral students.

We are funded by the Health Resources and Services Administration Behavioral Health Workforce Education and Training grant and are committed to training interns in culturally-informed clinical care by providing opportunities to serve vulnerable, underserved patient populations that are culturally and linguistically diverse.

Graduates are prepared to work effectively in interprofessional settings and provide interdisciplinary, team-based, and trauma-informed care. Additionally, interns are equipped to serve rural, border, child, adolescent, and transitional age youth in medically underserved communities.

Where you live is as important as where you study, and Tucson is a great place to live! Our Southwestern city, surrounded by the unsurpassed beauty of the Sonoran Desert, is uniquely gorgeous and culturally diverse.

Tucson is:
A UNESCO Creative City of Gastronomy • A Top-Five Cycling City
A Film, Music & Arts mecca • A Science City
A World Festival & Event City
Program Details

Our program’s clinical training methods are primarily experiential, under close supervision, and complemented by formal and informal didactic activities.

Rotations
In partnership with Banner – University Medical Center Tucson, our internship offers unique, comprehensive, and diverse training opportunities in:
- Working with inpatient and outpatient populations
- Providing care to rural, underserved communities
- Serving Native American populations
- Training in integrated, interdisciplinary behavioral and primary care settings
- Telemedicine practice and training
- Border Health
- Psychology in the juvenile judicial system
- Health Psychology (sleep, pain, biofeedback)
- First episode psychosis care

Salary & Benefits
The funded internship positions are full-time and pay an annual salary of $28,352. Benefits include, but are not limited to:
- Paid time off
- Sick days
- Medical, dental, and vision health plans
